Complaint

Apple, Uber And Lyft Lawsuit

1. On April 12th 2017 at 9:17 pm I created a resume with 2 idea's I wanted to sell to Apple Inc. I didn't know how to approach apple inc about my 2 idea's so I thought this was the best method, so I sent my resume that is below into multiple positions in hopes that they would see it and bring it to Tim Cook and then talk to me about buying it. I thought they were people of integrity liked they claim to be. My 2 idea's were this, im going to show you my resume that I created.

Idea's For Apple Improvement's

On your Iphone 7 keyboard you should make it so people can customize there buttons to do certain things, like shortcuts, for example if I wanted to do "' Instead of pushing ' then " I should be able to make a another button that allows me to do both with the push of one button making the iPhone more effective for typing because people will be able to shortcut certain things that they use all the time, speeding up there wpm on the iphone.

Why don't you guys have a suggestions place where people come up with ideas and you buy them, if you like them? Wouldn't that be better then buying an entire company for an idea?

If you like my idea and want to use it, great! Please pay me for it though, im poor and need the money.

Respectfully,
Gabriel

Senior Software Engineer	Apr. 12, 2017	-
Sr. Engineering Program Manager, Maps	Apr. 12, 2017	-

So I submitted my idea through a resume and applied to those jobs with it. Now when I uploaded the resume I put it in two places, one in primary resume and one in additional resumes because of this I had to do Iphone Improvements 4 and Iphone improvements 3 it wouldn't let me use the same name so I had to do that to get it on there twice, I wantd to make sure they saw it and I had a shot at selling them my 2 ideas. Now after I didn't hear back from them, I figured they weren't interested so I moved forward, however, On April 13th 2017 at 9:48am I added in on my Iphone Improvements 4 resume that i created on pages on my macbook pro the date 4/12/2017, it was recorded already when I originaly made the document but I wanted to stamp it just in case. That was the only thing I added in was the date, the original resume with my 2 ideas that I sent on apples website through there resume system is still there exactly how I wrote it without the date on the bottom. The original file that I have it wrote on which was on 4/12/2017 at 9:17 pm has the date but its a locked file and I wan't dont want to mess with it because of this case, I want to point something out though, I have other backups of this file for security purposes and they say it was modified on April 13 2017 at 9:48am where as my file on my macbook pro says it was modified April 25 2017 at 10:16 pm, now im gonna say this, I honestly don't remember if I went into that file on my macbook pro and did anything, I firmly believe I did not and I have backups that show when I actually edited the file which was April 13 2017 at 9:48am and I will provide to the court. I personally believe that apple inc may have adjusted the date that I edited the file on my macbook pro to April 25 2017 at 10:16 pm although I can't prove this I did update my macbook pro with a new update on April 27 2017, by this point I honestly thought they weren't interested in my 2 ideas and they may or may not have changed the date I modified it but I can prove with my backups that the date I actually modified the file was april 13 2017 at 9:48 am.

2. Now I started to do part time driving with Uber and Lyft. I started driving with Uber on April 18 2017 but I had to wait a few days or week's for everything to clear before they let me start actually driving, I have a picture of my Geico insurance card that is dated from April 5 2017 saved on my phone, I believe that is when I started the account and process to become an Uber driver. Now Lyft kept denying my pictures that I would send in and I will get to that in a minute, but I want to explain what Uber and Apple did to me. On May 13th 2017 I was just looking around Uber's website and I saw that they had a new program that they claimed started on April 11 2017 exactly one day before I sent that resume to apple inc to try and sell them my 2 ideas. I believe that apple told Uber about my idea for a few reasons, 1. They wanted it but didn't want to pay for it just like they don't want to pay there taxes 2. They back Lyft and Uber is there competitor and they wanted me to bring a law suit against Uber and potentialy shut them down and Lyft would now become the primer ride service. 3. If I didn't bring a lawsuit against Uber

then Uber could simply sell or give Apple the idea and say that I never offered it or that I stole it from Uber. I don't have all the facts, but its very strange that Uber started there patent buying program UP3 on April 11 exactly one day before I sent the resume with my idea's to apple on April 12 2017, I don't know if there is a way to prove when they actually came up with that idea, I don't have the reasources to investigate it myself but I am accusing Uber and Apple of conspiring together to steal my two idea's. Below is a screen shot of there patent program when I found it on May 13th 2017.

UBER Ride Drive Cities

Timing of Events:

Dates	Description
April 11, 2017	UP3 Patent Purchase Program is announced
April 24 - May 23	Submission window is open
May 24 - July 6	Submission review period
By July 7	Parties notified of either Uber's intent to move on to the next stage of diligence or our intent to pass on the opportunity
By August 8	Parties that are notified of Uber's tentative interest to purchase must supply further information requested by Uber (which may include information regarding encumbrances, litigation, etc.) and provide a signed agreement, banking information, and relevant tax-related information

3. Lyft. Around the same time I was setting up my Uber account I also set up a Lyft account, now Lyft for some reason kept denying my picture over and over again and would not let me set up an account with them because they kept refusing my picture of myself, I became angry so I took a shot at them. I knew that apple was heavily invested in Lyft so I took a shot at both of them and sent this

Dear Lyft or Apple, Here is my smile :)

I know you are haughty and arrogant people who think they are untouchable. You have insulted me at every opportunity you had the chance to, however you now have my full attention. Now i know you are also jealous because someone with no university education can come up with 2 ideas better then anything your staff is capable of coming up with and you would love to steal my ideas like you do from the university kids from around the country. I hope you do, so i can sue you to the fullest extent possible. I also hate homosexuals something you are in full support of, and i hate them because Jehovah also hates them, because they are unnatural and disgusting. Now let me explain how this is going to work, your company is going to be restructured and given to people who are worthy, a person worthy like Steve Jobs, the person you had a hand in murdering. Do i have your attention, Tim Cook? Perhaps you should

---

open up a New office next to the UN building where some of you are going.

I wrote this message to Lyft on April 13 2017 and I sent it to them as my new picture because they kept denying all my pictures that I sent and I felt they were doing it on purpose. Lyft has a copy of this. Now on my Macbook pro it says that I modified this file on April 25th 2017, I believe that Apple also changed this date and I can prove through a backup that I have, that the last time I modified this file was April 13 2017 the same day I wrote it. Below are my 2 screen shots, on the right my macbook pro file and left my flash drive file.

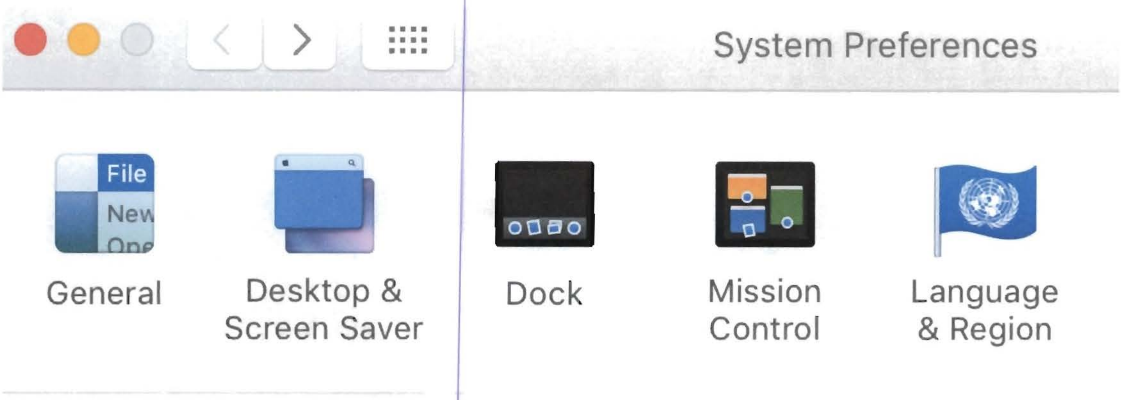
4. Restitution. Im seeking damages for this treachery that I believe happened against me and I want to sue all three companys for 6.66 billion dollars. I understand the amount is high and to be honest I feel that I should ask for more, but if they did what I accuse them of doing, they stole from a person who has nothing; Apple has 246 billion dollars in cash, and all I wanted to do was sell them 2 idea's that would have helped there company, instead I believe they resorted to treacherous underhanded tactics to steal my idea's without paying me anything, why? They hate me and because I have different beliefs then them and because I don't wan't to live a life style like some of them do nor do I support it. If im lying, I lied in a federal court of the United States of America, but I didn't and what Im telling you is the truth, the whole truth and nothing but the truth and I will place my hand on Jehovah's word and say that. This case represents a bigger problem then another dishonest company from California doing something dishonest, it represents a problem inside the United States of America where people take advantage of and abuse there neighbors to get ahead. The United States was founded by people fighting against opressive wolves that abuse and steal from anyone and everyone and that same evil has returned; All you have to do is follow the color blue and it will lead you to all the evil. I have a list of other complaints against Uber and Lyft but that would be another lawsuit in itself, I tried to get a lawyer to represent me in that one but no one would meet in person and everyone wanted me to tell them over the phone my whole case and to be honest I didn't feel comfortable doing that because they could take my case that I have against Uber and Lyft and have someone in another part of the country open it against them and cheat me out of it. I don't know my way around a court room

or the legal words in a court room but I believe a poor person like myself should have the right to have his or her case heard, I don't have or make much money and I can't really even afford a lawyer, If you wanted to appoint one to me I would like to think about it. Please let this case be heard by a judge, and please give a fair investigation into these accusations I have made against Apple, Uber and Lyft.

5. For the greater good. Your honor, I have three more accusations to make against Apple Inc and especially Tim Cook, the first is a future attempted mass murder of employees at apple that are unwilling to conform to certain ideologies that he thinks. Inside the the new apple headquaters they are building, if you carefully investigate the materials being used and planned to be used you will find them toxic to the human body causing it death by cancer. It's what they did to Steve Jobs your honor, Steve brought his lunch that his wife made him everyday to work, he kept it in the break room like everyone else, he was one of the people and he loved his staff, people there though put a certain toxic mixture into his food and drink and it caused him cancer and evenual death. The new age weapons, biological and normal things that are made from toxic things, the ones they want to eliminate now stand against Tim Cook and his evil helpers, they uphold the integrity that Steve Jobs built inside apple and they protect peoples privacy from the spying eyes of the United Nations, something the United Nations wants to invade and use for the worst possible reasons imaginable. Tim Cook is essentialy a modern day Hitler and his methods of killing people are just more advanced and look more accidental or tragic, and I can assure you they are not, If you carefully investigate everything I am claiming, you will find a disturbing truth. Tim Cook was Steve Jobs first mate, he was suppose to be a trusted friend and helper, instead, he became like Judas Iscariot and betrayed him to death and everything he stood for. The final thing Tim Cook is responsible is once again betrayal of his friend Steve Jobs, when IOS was first developed he stole the code and gave it to Google and Android was released within the same year as IOS, he is a thief to the core and his methods remain the same. After you investigate this and the truth is revealed, you will feel like asking President Trump to move a Naval destroyer into firing range of that new Head Quaters of apple inc and your recomendation would be to level it. The people resoponsible for this will disgust you so much that you would recommend bringing a judgement of War Crimes against humanity. If you follow the paper trail it will lead you all the way to the United Nations. I raise my right hand and my left and I swear to tell the truth and nothing but the truth so help me Jehovah. I also place my right hand and my left on my father's holy scriptures and I swear to tell the truth so help me Jehovah. Even though parts of it have been corrupted to hide the truth, I swear on the parts that aren't and by his name Jehovah.

Page 7 of 7



Your honor, last time I checked, I live in the United States of America and not the United Nations of America as Tim Cook's flag seems to represent. If that isn't insulting enough, him having secret silicon valley meetings to try and plot against our next President Donald Trump is, its treasonous, trying to keep him out of office is treasonous, keeping money that Apple makes in other countries out of the United States because he hates the United States government is treasonous. Blowing up two towers because the people inside them don't agree with your idealogies is treasonous, making people jump to there death together hand and hand is fucking treasonous and I would deliver such people who choose to live there life this way and do these kinds of things to there neighbors the worst end this earth has to offer. I can't offer you recorded phone calls, pictures, bank account numbers or other proof, I trust the one who told me and I have brought this case to the highest authority that the United States of America has to offer, I have told no lie to cover up or mislead anyone, I place my right hand and left on Jehovah's holy writtings, the parts that haven't been corrupted, and I swear to tell the whole truth and nothing but the truth so help me Jehovah.
